

hanit® MODULAR COMPOSTER

For compact composting

We've learned a lot about reclaiming valuable raw material from waste: that's why we developed composters. But compost creates heat and moisture so materials need to be chosen carefully. Wooden composters begin to decay and steel starts to rust. That's why we love hanit® composters: the rot- and moisture-resistant choice.

Material:

hanit® Recycled Plastic

Surface:

Structured, grained

Dimensions (W x L x H):

100 x 100 x 90 cm

Weight:

56 kg

Capacity:

approx. 650 l

Version:

Without bottom

Delivery as construction kit

Advantages:

Eases gardening work

Rot-free from both inside and outside

Durable and dimensionally stable

Weather-proof

Simple interlocking system

For hobby- and leisure gardeners

 Brown
