

TRIANGLE series - 3 bowls - 1 set of salad servers

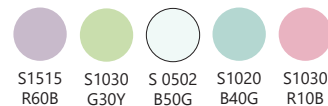

TECHNICAL DETAILS:

COLOURS ON BOWLS - NCS

COLOURS ON SALAD SERVERS - NCS

USE:

The bowls can be used for food. You can whisk in the bowls. They are suitable for use in microwaves, but NOT conventional ovens. The bowls must NOT be frozen as the plastic may crack. They are NOT suitable for hot oil.

BOWLS AND SALAD SERVERS:

MATERIALS:

**BOWLS: PP bio plastic**

The bowls are made from RESIDUAL BIO OIL in accordance with the mass balance principle. Both types of plastic types are food grade. The bio-oil is manufactured according to ISO 1404/44.

Using bio-oil reduces carbon emissions by 74% compared to fossil-based plastics. Use for many years and dispose of as hard plastic for circular recycling. The bowls cannot be composted, so do not throw them in nature.

The salad servers are currently made of ordinary SAN as this, as far as we are concerned, is not yet available in bio-based plastics.

Manga In buys one tree for every case of 10 pieces of large bowls sold. Manga In buys one tree for every one case of 12 pieces of medium bowls sold. Manga In buys one tree for every one case of 24 pieces of small bowls sold.

Manga IN supports Trees for the Future in their work to end hunger, poverty and deforestation in vulnerable areas of the planet.

The series is designed by award-winning Danish designer Julie Storm.
